- Object-Oriented Programming (OOP), Software Engineering

PROFILE

Web Developer with hands-on experience in full-stack development, from designing user interfaces to implementing backend logic, with a focus on clean code. Check out my portfolio to see my projects in action!

I have worked on various projects utilizing AI assistance, but I possess in-depth knowledge of each component and understand how every aspect was implemented. Seeking an opportunity to apply my skills in real-world projects and gain industry experience.

WORK EXPERIENCE

Projects

Event Management System (Full-Stack Web Application)   January-2025

- Developed a comprehensive event management platform with features for event creation, booking, and user roles (admin/attendee).
- Designed a relational database schema and integrated it with the backend using SQL Server.
- Wrote technical documentation (SRS, SDD, Testing Reports) following SDLC best practices.
- Implemented CRUD operations and ensured seamless data flow between frontend and backend.

Portfolio Website (Personal Project)   April-2025

- Built a responsive portfolio website to showcase projects, skills, and professional background.
- Optimized for performance and SEO using static site generation (Gatsby).
- Integrated interactive elements (e.g., filters, dynamic content loading) for improved UX.

Project Collaborator & Technical Writer

- Produced comprehensive documentation for projects, including setup, functionality, and usage guides.
- Collaborated with classmates on various group projects, playing a key role in planning, execution, and delivery.
- Developed user guides and technical documentation to ensure clarity and usability.
